

Review of the Structure of Allied Health

June 2014

Chief Allied Health Office

Phase 2

Thank you for your contributions!

The consultants conducting the Allied Health Review Dr Rosalie Boyce and Janice Mueller along with the Executive Management Group are delighted with the high participation rate from staff in the four staff workshops held in May and wish to thank everyone for their contributions. A total of 105 staff came along to share their thoughts about strengthening the professional and operational governance structure of allied health in ACT Health.

Many thanks also to the staff from Organisational Development, Employee Services and the Workforce Policy and Planning Unit who listened carefully to the contributions from each of the table groups and recorded an enormous amount of feedback. The workshops explored the Six Draft Principles put forward in the Phase One Report and the concept of an 'allied health identity'.

The Phase 2 Report.

It was hoped that the report could be tabled at a Project Reference Group meeting in June but due to the need to synthesise a large volume of responses from submissions and the workshops the final report submission has been delayed, therefore this meeting has been postponed.

Project Reference Group.

The Project Reference group will meet to receive

the Phase Two Report and a presentation from the consultants. The group will be asked to assist with dissemination of information about the report as part of the consultation process. It is anticipated that the next Project Reference Group will not occur until after the July school holidays. Thank you for your patience.

The progress so far...

52	Face to face interviews
8	Telephone interviews
89	Staff attended the information session
203	Practitioner survey responses
78	Manager/ leader survey responses
3	Focus groups with 46 attendees
18	Written submissions
2	Project Reference Group Meetings
5	Newsletters
4	Staff workshops with 105 attendees
1	Phase One Report tabled in April
