

Dear 

### **Freedom of Information (FOI) request**

I refer to my correspondence of 15 August 2018 in response to your application to access information under the *Freedom of Information Act 2016* (the Act).

#### Decision on access

I can inform you that review period for the release of five deferred documents is now completed.

I have decided to grant partial access to the five documents. The information redacted in the documents I consider to be information that would, on balance, be contrary to the public interest to disclosure under the test set out in section 17 of the Act.

I have included as Attachment A to this decision the Schedule of relevant documents. The documents released to you are provided at Attachment B to this letter.

In reaching my access decision, I have taken the Act and the content of the documents that fall within the scope of your request into account.

The Act has a presumption in favour of disclosure. As a decision maker I am required to decide where, on balance, public interests lies. As part of this process I must consider factors favouring disclosure and non-disclosure. In accordance with Schedule 2.2(a)(ii) of the Act, the redacted information is personal information about an individual and is therefore considered to be contrary to public interest as it could prejudice the protection of an individual's right to privacy.

#### Charges

Processing charges are not applicable for this request as fees have been waived in this instance.

### Online publishing – disclosure log

Under section 28 of the Act, ACT Health maintains an online record of access applications called a disclosure log. Your original access application. My decision of 15 August 2018 and documents released to you were published on the disclosure log on 20 August 2018. This decision and the documents released to you will be published in the disclosure log not less than three days but not more than 10 days after date of decision. Your personal contact details will not be published.

You may view the ACT Health disclosure log at <http://www.health.act.gov.au/public-information/consumers/freedom-information/disclosure-log>.

### Ombudsman review

My decision on your access request is a reviewable decision as identified in Schedule 3 of the Act. You have the right to seek Ombudsman review of this outcome under section 73 of the Act within 20 working days from the day that my decision is published in ACT Health disclosure log, or a longer period allowed by the Ombudsman.

If you wish to request a review of my decision you may write to the Ombudsman at:

The ACT Ombudsman  
GPO Box 442  
CANBERRA ACT 2601

Via email: [actfoi@ombudsman.gov.au](mailto:actfoi@ombudsman.gov.au)

### ACT Civil and Administrative Tribunal (ACAT) review

Under section 84 of the Act, if a decision is made under section 82(1) on an Ombudsman review, you may apply to the ACAT for review of the Ombudsman decision.

Further information may be obtained from the ACAT at:

ACT Civil and Administrative Tribunal  
Level 4, 1 Moore St  
GPO Box 370  
Canberra City ACT 2601  
Telephone: (02) 6207 1740  
<http://www.acat.act.gov.au/>

Should you have any queries in relation to your request, please do not hesitate to contact the FOI Coordinator on 6205 1340 or email [HealthFOI@act.gov.au](mailto:HealthFOI@act.gov.au).

Yours sincerely

A handwritten signature in black ink, appearing to read 'C Barr', written in a cursive style.

Conrad Barr

**Director**

Health Protection Service

17 September 2018

## FREEDOM OF INFORMATION REQUEST SCHEDULE

Please be aware that under the *Freedom of Information Act 2016*, some of the information provided to you will be released to the public through the ACT Government's Open Access Scheme. The Open Access release status column of the table below indicates what documents are intended for release online through open access.

Personal information or business affairs information will not be made available under this policy. If you think the content of your request would contain such information, please inform the contact officer immediately.

Information about what is published on open access is available online at: <http://www.health.act.gov.au/public-information/consumers/freedom-information>

NAME	WHAT ARE THE PARAMETERS OF THE REQUEST	File No

**To:** Barr, Conrad (Health) <Conrad.Barr@act.gov.au>  
**Cc:** Salgado, Sashini <Sashini.Salgado@act.gov.au>  
**Subject:** RE: HPE CM: Jervis Bay Territory jurisdiction [SEC=UNCLASSIFIED]

Thanks Conrad

Just to be clear:

1. ACT Health advice is i) that there is a potential risk and ii) that we should accept NSW EPA's offer to undertake consumption calculations to assist us in forming advice to DIRD Yes and Yes
2. ACT (CMTEDD) should inform DIRD of both the risk and ACT intention to work with NSW EPA to develop consumption advice

**QUESTIONS**

**Do you need CMTEDD to liaise with NSW EPA to undertake the consumption calculations? Yes Please**

**Is there a view that no action should be taken until the results are finalised? Not from ACT Health as full results will not be available for all JBT sampling areas until at least the end of May. NSW EPA advised us that based on their quick assessment of the results from Flat Rock Creek and Captains Lagoon which flow into Jervis Bay near Hyams Beach and Green Patch (Wreck Bay is on the Southern side of the peninsula and there are no results from there yet) that we had the same potential issues as Currumbene Creek and offered to do the dietary calculations for us and assist in the formulation of advice.**

**What is Defence's position on this? Not clear although they advised they would provide a risk assessment with their final report, but that would not include dietary calculations or advice.**

**Will ACT Health charge DIRDC for costs to cover this work? We need DIRD's approval to do this to be able to bill them as this is beyond the scope of the expired MOU and SLA.**

3. Once we have consumption advice ready, CMTEDD will arrange for formal provision of advice to DIRDC
4. Pending DIRDC's decision, there may be additional service (eg engagement, working with DIRD to develop guidance materials) for ACT Health to provide – this will be costed and charged to DIRDC.

I'm speaking with DIRDC this afternoon so want to be clear on these steps – many thanks

David

**Subject:** FW: HPE CM: Jervis Bay Territory jurisdiction [SEC=UNCLASSIFIED]

Hi David

Noting the email trail below and following on from our telephone conversation earlier today.

ACT Health's advice is that there is potential risk resulting from Human Consumption of some marine species as identified in the sample of results from Jervis Bay Territory (JBT) provided to the ACT by the Defence contractor. Noting the offer from NSW EPA to undertake dietary consumption calculations and assist with any potential advice, ACT Health's advice is that the dietary consumption calculations are necessary to accurately quantify any potential risks and ensure the residents and visitors to the area concerned are provided appropriate advice if required.

Given the almost catch 22 request below from DIRD about the need for advice and the basis for same, it is appropriate that this potential health concern and the request for further work to be undertaken by NSW EPA and PFAS taskforce is brought formally to the attention of DIRD for a decision.

As per our telephone conversation, you indicated a preference for formal communication with DIRD on this matter from CMTEDD, could you please arrange for same as matter of priority.

ACT Health is happy to assist in way possible to expedite this matter, noting NSW EPA is expected to be issuing public advice in relation to Currumbene Creek which flows into Jervis Bay some distance to the north of JBT on Monday 7<sup>th</sup> May 2018 .

Please do not hesitate to contact Lyndell or I in relation to this matter.

Regards  
Conrad

Folks,

Thank you for your time today to discuss jurisdictional matters for Jervis Bay Territory and engagement consideration for the Wreck Bay Aboriginal Community through their council and Board.

As an action out of the meeting, NSW EPA, ACT EPA and JBTA will liaise on agreed processes and levels of assistance on future considerations resulting from review of sampling results as they are made available from this Defence investigation.

At this time you have (NSW EPA, ACT EPA and JBTA) recently been provided with raw data for biota predominately covering the northern locations of JB territory as well as soil and water samples across the territory.

Upon review of the pending lab work orders, I would expect to be able to provide the next batch of raw results to you as follows:

Late May:

- Jervis Bay Marine fish invert,
- Summercloud Creek fish, invert,
- Mary Creek fish invert, terrestrial & sediment,
- Lake McKenzie,
- Jervis Bay sediment

- Mary Creek FW plant,
- Wreck Bay plant, invert,
- Summercloud SW fish
- Jervis Bay invert,
- Residential Gardens (Wreck Bay & Jervis Bay Villages),
- Captains Lagoon fish
- Wreck Bay fish & invertebrates
- Mary Creek Sediment,
- Jervis Bay secondary site fish
- Summercloud Creek Fresh water invertebrates/plants
- Captains Lagoon Fresh water invertebrates/Vert/plants

Early to Mid June:

- Wreck Bay area fresh water invert, sediment
- Wreck Bay marine fish, invert
- Jervis Bay marine secondary fish
- Summercloud Creek freshwater fish, invert
- Summercloud Creek saltwater invert,
- Captain's Lagoon fresh Plants
- Jervis Bay marine invertebrates

Please note that our investigation team are currently sampling post a recent rain event that occurred at the territory and that sampling of GW monitoring wells continue.

Happy to discuss,

Regards,

**Subject:** RE: HPE CM: Jervis Bay Territory jurisdiction

Hi all,

Thankyou for the meeting this morning. The NSW EPA understands that a recommendation for the provision of precautionary dietary advice is required from the ACT government (either ACT EPA or ACT Health) before DIRD (JBTA) will make a decision regarding whether the Commonwealth will lead on this issue or whether the responsibility will be formally transferred to the Act government.

Accordingly, the NSW EPA and OEH have identified that precautionary dietary advice may be required for whitebait, yabbies, whelk, shrimp, oysters and mullet based off the raw data that has been provided to all members of the HMAS Creswell/Jervis Bay Range Facility Project Control Group. The data has indicated that serving size restrictions would be appropriate and protective of the local community and the NSW EPA recommends that this work be undertaken in the Jervis Bay Territory.

The NSW EPA notes that additional data is still to be received from Defence in the coming weeks and also anticipates that some additional species may also require precautionary dietary advice.

The NSW EPA and the NSW PFAS Taskforce have the capacity to assist either DIRD (JBTA) or the ACT government with the dietary consumption calculations and also assist with the development of the community and stakeholder engagement strategies if required.

Subject: HPE CM: Jervis Bay Territory jurisdiction

Hi [REDACTED] and [REDACTED]

The NSW EPA has been in recent discussions with various agencies of the ACT government to try and establish roles and responsibilities regarding the aquatic biota results from the PFAS investigations at HMAS Creswell and the Jervis Bay Range Facility. The main issues that NSW have informed the ACT about are as follows:

- NSW EPA will be engaging with the community in NSW in the Jervis Bay area on other PFAS related precautionary dietary advice in Currumbene creek in the next few weeks. This may trigger community interest around the Defence PFAS investigation from HMAS Creswell and Jervis Bay Range Facility.

- Preliminary aquatic biota results in creeks in the HMAS Creswell and Jervis Bay Range Facility PFAS investigation area indicate elevated PFAS concentrations. These are likely at levels that require precautionary dietary advice if consumed by the local community.
- It is noted that Defence is carrying out the investigation and undertaking the risk assessment - the reports will indicate if there is risk, but it is not Defence's role to provide precautionary dietary advice to the community.
- Both NSW and ACT noted that the Defence results for Jervis Bay are preliminary and any precautionary dietary advice would need to be based on the QAQCed and complete dataset, which can be requested from Defence prior to the release of their risk assessment.
- Once these results are available from Defence, any precautionary advice required will need to be released as soon as possible.

As the contamination is on commonwealth territory, the NSW EPA requests that Jervis Bay Territory Administration discuss with the ACT Government to confirm who is the responsible jurisdiction (ACT or Federal) for the release of precautionary dietary advice and communications.

Can you please let the NSW EPA know at your earliest convenience.

Please contact me if you would like to discuss further.

Regards,

Hi Conrad and David

I have just spoken with [REDACTED] and below is the update:

- NSW EPA do not have the full set of biota results from Defence, it will be a month or so before they get the full set. I advised Corrie to please analyse the results they have on hand. NSW EPA will have that done by the end of this week;
- [REDACTED] will organise a teleconference with ACT for next Tuesday; and
- [REDACTED] also advised that Defence cannot give time line.

I understand that the PFAS Working Group has been transferred from Prime Minister and Cabinet Department of Environment and Energy – I could contact DoEE to request Defence to work with us, if appropriate.

Warm regards  
Narelle

Folks,

Thank you for your time today to discuss jurisdictional matters for Jervis Bay Territory and engagement consideration for the Wreck Bay Aboriginal Community through their council and Board.

As an action out of the meeting, NSW EPA, ACT EPA and JBTA will liaise on agreed processes and levels of assistance on future considerations resulting from review of sampling results as they are made available from this Defence investigation.

At this time you have (NSW EPA, ACT EPA and JBTA) recently been provided with raw data for biota predominately covering the northern locations of JB territory as well as soil and water samples across the territory.

Upon review of the pending lab work orders, I would expect to be able to provide the next batch of raw results to you as follows:

Late May:

- Jervis Bay Marine fish invert,
- Summercloud Creek fish, invert,
- Mary Creek fish invert, terrestrial & sediment,
- Lake McKenzie,
- Jervis Bay sediment
- Mary Creek FW plant,
- Wreck Bay plant, invert,
- Summercloud SW fish
- Jervis Bay invert,
- Residential Gardens (Wreck Bay & Jervis Bay Villages),
- Captains Lagoon fish
- Wreck Bay fish & invertebrates
- Mary Creek Sediment,
- Jervis Bay secondary site fish
- Summercloud Creek Fresh water invertebrates/plants
- Captains Lagoon Fresh water invertebrates/Vert/plants

Early to Mid June:

- Wreck Bay area fresh water invert, sediment
- Wreck Bay marine fish, invert
- Jervis Bay marine secondary fish
- Summercloud Creek freshwater fish, invert
- Summercloud Creek saltwater invert,
- Captain's Lagoon fresh Plants
- Jervis Bay marine invertebrates

Please note that our investigation team are currently sampling post a recent rain event that occurred at the territory and that sampling of GW monitoring wells continue.

Happy to discuss,

Regards,

 Subject: RE: HPE CM: Jervis Bay Territory jurisdiction

Hi all,

Thankyou for the meeting this morning. The NSW EPA understands that a recommendation for the provision of precautionary dietary advice is required from the ACT government (either ACT EPA or ACT Health) before DIRD (JBTA) will make a decision regarding whether the Commonwealth will lead on this issue or whether the responsibility will be formally transferred to the Act government.

Accordingly, the NSW EPA and OEH have identified that precautionary dietary advice may be required for whitebait, yabbies, whelk, shrimp, oysters and mullet based off the raw data that has been provided to all members of the HMAS Creswell/Jervis Bay Range Facility Project Control Group. The data has indicated that serving size restrictions would be appropriate and protective of the local community and the NSW EPA recommends that this work be undertaken in the Jervis Bay Territory.

The NSW EPA notes that additional data is still to be received from Defence in the coming weeks and also anticipates that some additional species may also require precautionary dietary advice.

The NSW EPA and the NSW PFAS Taskforce have the capacity to assist either DIRD (JBTA) or the ACT government with the dietary consumption calculations and also assist with the development of the community and stakeholder engagement strategies if required.

**Subject: HPE CM: Jervis Bay Territory jurisdiction**

Hi [REDACTED] and [REDACTED]

The NSW EPA has been in recent discussions with various agencies of the ACT government to try and establish roles and responsibilities regarding the aquatic biota results from the PFAS investigations at HMAS Creswell and the Jervis Bay Range Facility. The main issues that NSW have informed the ACT about are as follows:

- NSW EPA will be engaging with the community in NSW in the Jervis Bay area on other PFAS related precautionary dietary advice in Currumbene creek in the next few weeks. This may trigger community interest *around the Defence PFAS investigation* from HMAS Creswell and Jervis Bay Range Facility.
- Preliminary aquatic biota results in creeks in the HMAS Creswell and Jervis Bay Range Facility PFAS investigation area indicate elevated PFAS concentrations. These are likely at levels that require precautionary dietary advice if consumed by the local community.
- It is noted that Defence is carrying out the investigation and undertaking the risk assessment - the reports will indicate if there is risk, but it is not Defence's role to provide precautionary dietary advice to the community.
- Both NSW and ACT noted that the Defence results for Jervis Bay are preliminary and any precautionary dietary advice would need to be based on the QAQCed and complete dataset, which can be requested from Defence prior to the release of their risk assessment.
- Once these results are available from Defence, any precautionary advice required will need to be released as soon as possible.

As the contamination is on commonwealth territory, the NSW EPA requests that Jervis Bay Territory Administration discuss with the ACT Government to confirm who is the responsible jurisdiction (ACT or Federal) for the release of precautionary dietary advice and communications.

Can you please let the NSW EPA know at your earliest convenience.

Please contact me if you would like to discuss further.

**Subject:** JBTA - additional biota consumption information required

H [REDACTED]

NSW EPA met with ACT gov this afternoon and were pointed in your direction. In order to mostly accurately calculate dietary advice for PFAS in JBTA, the NSW EPA requires additional information regarding the consumption of biota by the local Wreck Bay Aboriginal community – how much of their diet consists of sampled biota, what part of the organisms are consumed and where do they source these organisms from?

Main aquatic organisms captured in the current sampling regime include:

- A) Fish (Bream, Mullet, Whitebait, Leatherjacket, Bonito, Flathead)
- B) Crustacea (Shrimp, Yabby)
- C) Bivalves (oysters)
- D) Gastropods (mud whelk and abalone)
- E) Echinoderm (sea urchin)
- F) Polychaetes (marine worms)
- G) Aquatic plants (Macrophyte, Kelp, Ribbonweed, Neptunes Necklace)

Key questions:

- Fish – what parts do they typically eat (the whole fish or just fish fillets)? - how much do they typically consume per serve and what % of their diet is fish? – where do they source these from (I am guessing for the most part these are caught from the bay)?
- Crustacea, bivalves, gastropods, echinoderms, polychaetes – how much of their diet consists of these? - where do they usually source these from (I am guessing shrimp, urchins, oysters and abalone are sourced from the bay)?
- Aquatic plants – do they consume these? - If so what is their intake quantity?

Terrestrial organisms captured in sampling regime include:

- A) Fox
- B) Rabbit

- Do they eat these mammals? If so, what portions and how much of their diet consists of these?

If you could please let me know if JBTA holds this sort of information that would be appreciated, or if you can point me in the direction of someone who does.

Regards,

[Redacted]

**To:** Barr, Conrad (Health)  
**Cc:** [REDACTED]  
**Subject:** FW: JBTA - additional biota consumption information required  
[SEC=UNCLASSIFIED]

Hi Conrad

Thanks again for your time recently to discuss further engagement on Defence's preliminary PFAS findings in JBT.

If I understand correctly some engagement on consumption information is necessary at this point because in some circumstances if there were some parts of tested animals eaten and not others, this could potentially mean the difference between whether precautionary dietary advice might need to be provided for the particular species or not. Similarly, it might mean that any advice you might suggest to us is necessary might have a lower recommended consumption amount or vice-versa.

I suggest any necessary engagement on this be undertaken in close consultation with Defence. Defence is the Commonwealth's lead on PFAS in the JBT, and has built a productive relationship with WBACC on Defence's PFAS testing over time. I understand Defence plans to update WBACC on testing in the JBT at an upcoming WBACC board meeting. Potentially WBACC board meetings could be a useful starting point to provide some general awareness of your proposed engagement. I understand Defence plans to have confirmed test results this month, which may also help to target the proposed engagement as well as any precautionary dietary advice that might be necessary. The contact at Defence is [REDACTED] who would be able to advise further on this. Regardless of the approach, Defence has asked that they be kept in the loop for any planned engagement on PFAS in the JBT, particularly with WBACC.

I would also ask that any engagement on *this matter* be undertaken by the ACT rather than NSW EPA, who I understand is assisting the ACT to interpret the Defence preliminary test results. The key reason behind this is continuity, with the ACT undertaking water testing in the JBT, and also having provided previous messaging to the Jervis Bay Community on PFAS (such as the meeting the ACT Chief Health Officer held previously in the JBT and also the closure of Mary Creek). It would be good if the approach was as consistent as possible.

You also noted you'd like to engage with Booderee National parks. Given the high number of tourist movements into JBT each year this is appropriate. I suggest speaking with [REDACTED] from Booderee National Park [REDACTED] is a member of the Defence PFAS Control Group for Jervis Bay Territory, and has been provided all the same information from Defence as the ACT and JBTA have as far as I'm aware.

Finally I would ask that you please let us know before commencing engagement with WBACC or the community more broadly if you still advise this is necessary. We will have to prepare some briefing to coincide with this.

Please do not hesitate to contact me if you wish to discuss further.

Kind regards  
[REDACTED]

Subject: RE: JBTA - additional biota consumption information required [SEC=UNCLASSIFIED]

H [REDACTED]

Thanks for your initial reply to [REDACTED] on this.

As identified by [REDACTED] we advised her to engage with you directly. This was to enable NSW EPA to provide accurate and appropriate advice on safe consumption levels of certain marine species. In doing so appropriate account needs to be given to the consumption patterns in relation to volume and frequency of consumption of particular species and the way in which the species is consumed by the principal consumers of it. For example if a species is principally consumed by infrequent day visitors rather than regularly consumed by local residents, it will have a significant bearing on the dietary advice we provide.

Likewise if meat fillets are the principal part of a particular species used, the advice may quite different from if the principal consumers regularly consumed the whole animal including key organs like liver and or intestines etc. We had hoped DIRD or defence through your local engagement activities may have known this or been able access people who could provide you with the advice. Given this is not the case, it would appear likely that our next steps to gain the information we need will be to engage directly with Booderee National Park and the local community. As per the email chain below, I will be the conduit to DIRD for all future requests and advice.

We will keep you advised of our progress.

Please feel free to contact me in relation to this.

Regards

Conrad

H [REDACTED]

NSW EPA met with ACT gov this afternoon and were pointed in your direction. In order to mostly accurately calculate dietary advice for PFAS in JBTA, the NSW EPA requires additional information regarding the consumption of biota by the local Wreck Bay Aboriginal community – how much of their diet consists of sampled biota, what part of the organisms are consumed and where do they source these organisms from?

Main aquatic organisms captured in the current sampling regime include:

- A) Fish (Bream, Mullet, Whitebait, Leatherjacket, Bonito, Flathead)
- B) Crustacea (Shrimp, Yabby)
- C) Bivalves (oysters)
- D) Gastropods (mud whelk and abalone)
- E) Echinoderm (sea urchin)
- F) Polychaetes (marine worms)
- G) Aquatic plants (Macrophyte, Kelp, Ribbonweed, Neptunes Necklace)

Key questions:

- Fish – what parts do they typically eat (the whole fish or just fish fillets)? - how much do they typically consume per serve and what % of their diet is fish? – where do they source these from (I am guessing for the most part these are caught from the bay)?
- Crustacea, bivalves, gastropods, echinoderms, polychaetes – how much of their diet consists of these? - where do they usually source these from (I am guessing shrimp, urchins, oysters and abalone are sourced from the bay)?
- Aquatic plants – do they consume these? - If so what is their intake quantity?

Terrestrial organisms captured in sampling regime include:

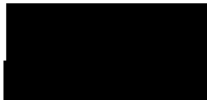

- A) Fox
- B) Rabbit

- Do they eat these mammals? If so, what portions and how much of their diet consists of these?

If you could please let me know if JBTA holds this sort of information that would be appreciated, or if you can point me in the direction of someone who does.

Hi Lyndell,

Below is an draft email for clearance through Conrad for [REDACTED] from the Department of Infrastructure and Regional Development.

Hi [REDACTED]

As discussed I have attached a summary of our microbiological testing results for the all of the potable waters site you requested from 2006 onwards, I have also included Kullindi Main, Kullindi BBQ and Bay Plenty in case you needed those sites as well (if you don't need them just delete the sheets on the excel workbook). As discussed, the sites that have been excluded are: Rail Tram and Bus Union (bore) camp; Rail Tram and Bus Union camp (rain water); Jervis Bay Village Territory Office; and Christian Minde. I have also attached a summary of the microbiological testing results for all of recreational water sites from 2006 onwards.

There is some discrepancy between sites over the years, namely when they were sampled. The Jervis Bay sampling program was reviewed in 2014 and as a result the sampling frequency was formalised along with all of the sites. Attached is the Jervis Bay Sample Tracking Sheet, this sheet lists all of the agreed sample sites along with the agreed naming of each site. From September 2014 the sampling and testing of sites has been conducted according to that sample tracking sheet.

If you need any more information please contact me.

Kind regards,

**To:** Krsteski, Radomir (Health)  
**Subject:** RE: INFORMATION REQUEST: JBT HEALTH SURVEILLANCE TIME SERIES REPORTING JERVIS BAY TERRITORY [SEC=UNCLASSIFIED]

Good morning Radomir

Thanks very much for the quick response.

If your JBT records do not identify land by use/ownership— can you, please provide a list of all health surveillance sites routinely tested in the JBT by ACT Health and I will identify the sites we require separate test results for in the:

1. Wreck Bay village precinct (403 ha); and
2. Booderee National Park (6,379 hectares including 875 hectares' marine park)

FYI Booderee comprises the majority of the JBT, however ACT Health also undertake testing on JBT land administered by the Department of Defence and the Department of Infrastructure and Regional Development and Wreck Bay Aboriginal Community Council.

Wreck Bay and Mary Creek are not the same site.

I will be in training from 0900 to 1400hrs today – however please call my landline before 0900hs 6274 7795 or mobile later in the morning if you have any further questions

Thanks again for actioning this matter so quickly – greatly appreciated.

Best Regards

**Subject:** FW: INFORMATION REQUEST: JBT HEALTH SURVEILLANCE TIME SERIES REPORTING JERVIS BAY TERRITORY [SEC=UNCLASSIFIED]

Hi 

I just left a message on your answering machine and thought best that I follow that up with this email. Just a couple of questions regarding the request you sent through below. I need some clarification, are Wreck bay and Mary Creek Beach the same site? And secondly does Booderee National Park include all of the sites in Jervis Bay or was there a specific site you were referring too?

Kind regards  
Rad

Hi Rad

Would you be able to assist with this request??

Please note they want this back by Wednesday so would need to have to Conrad by COB tomorrow.

Lyndell

Lyndell

1. The Department of Infrastructure and Regional Development (the Department) has received a request from the Wreck Bay Aboriginal Community Council (WBACC) and the Booderee National Park for details of all ACT environment water and health protection test results undertaken on Aboriginal Lands over several years.
2. Attached please find an extract of a time series test results for Environment and Planning Directorate environment water testing in the JBT from 2006 to the present for tests conducted on Aboriginal lands.
3. I seek your assistance to provide a similar table for health protection water testing undertaken by the Health Directorate for the Department over a similar interval (from 2006) for Aboriginal lands in the JBT:
  - a. Wreck Bay 403ha
  - b. and Booderee National Park.
4. Please note, this request excludes the most recent PFC test result already reported separately to the community.
5. I am hoping that ACT Health will have a cumulative report similar to Environment and Planning that can be easily exported into a table format, if not can we please discuss what is available and how it can be best presented.

I would be grateful if you could respond to this request by COB Wednesday 17 August 2016.

Please let me know if you have any problems with this request or timeframe-- I will be at a planning session from noon today until 1400hrs tomorrow but can be contacted on 0491102916.

Best Regards
